Vortex Designs LTD. was founded in 1996 to provide assistance to novice users and businesses struggling with transitions from paper transactions to mixed paper and electronic transactions.

Since that time, we have built a small client base that we continue to support, while simultaneously functioning as the in-house support resource for and an associate consultant for other firms

. This partnership has provided us with the opportunity to expand the range of services we offer and maintain a high level of quality.

Our commitment to provide the best service possible has provided us with steady, repeat business through some of the leaner times and has allowed us to continue to bring you the best that we can provide.
